EDUCATIONS

MIT World Peace University | Pune, Maharashtra
Bachelor of Technology (B.Tech) in Computer Science (Cybersecurity & forensics)

Sep 2024 - Present
CGPA : 7.6

PROJECTS

Huffman Steganography Tool (Python + C++)

- Developed a complete **Huffman Steganography Tool** combining a C++ Huffman encoder with a Python-based LSB steganography system.
- Built the full pipeline for compressing text, embedding binary data into RGB images, and reconstructing messages with **session-based Huffman decoding**.
- Implemented CLI and web versions: a **React + Flask web app** with drag-and-drop image handling, API endpoints (/encode, /decode), compression stats, and pixel-level embedding using Pillow.

Technologies / Tools Used : C++, Python, React, Flask, Pillow

VulnX | 🐙 Github

- Developed a full-stack **automated vulnerability assessment platform** using React, Node.js, Express, MongoDB, and Python.
- featuring automated security checks for HTTPS/SSL, security headers, cookies, CORS, information disclosure, directory listing, and sensitive file exposure, with scan history, vulnerability tracking, and PDF reporting.

Technologies / Tools Used : React, MongoDB, Tailwind CSS, Node.js, Express, Python

Simple & Secure Password Manager

- PassSecure**: Simple & Secure Password Manager - is a full-stack application demonstrating secure credential management. It features a Google Chrome extension (built with **HTML**, **CSS**, and **JavaScript**) that interacts with a **Python Flask** backend.
- The system encrypts all sensitive data using **AES-256** with a key derived from the user's local machine's MAC address ensuring that all credentials stored in the **PostgreSQL** database are bound to the specific device and cannot be accessed elsewhere.

Technologies / Tools Used : HTML, CSS, JavaScript, Python, Flask, PostgreSQL, AES-256

SKILLS

Databases :	PostgreSQL, MySQL, MongoDB
Frameworks & Libraries :	Flask, React, Tailwind CSS
Programming Languages :	Python, SQL, C, C++
Tools & Platforms :	PostgreSQL, Adobe Premiere Pro, Adobe Photoshop, Adobe AfterEffects, Git, Linux

EXTRACURRICULAR

- Smart India Hackathon (SIH)**: Worked as a core team member, contributing to team coordination, problem-solving, and project development.
- Video Editing & Content Creation**: Edited music videos, cinematic videos, and short-form content, focusing on storytelling, visual aesthetics, beat synchronization, and engaging transitions.
- Storytelling & Narrative Design**: Interested in crafting compelling narratives through pacing, structure, emotional beats, and impactful endings.
- Fitness & Strength Training**: Actively engaged in structured workout routines, focusing on strength development, discipline, and consistency.
